

## Yorktown Recreation

We use the suite from Musco. It helps us with our light usage billing.

However we do use one of these TORK timers at one of our Tennis Courts.

## Mount Kisco Recreation

We use some of the older style timers that make the lights go on and off and we have a digital one. I really don't like them. The pins always fall out. But I believe most electricians should be able to get some sort of timer that will work for you if you give them a call.

I used Musco's lighting system when I worked in Yorktown and I loved the App. I know it's a lot of money up front, but it saved me a number of times as we could turn them on or off from my phone.
